Finnair, the Finnish network carrier, ended FY2024 with revenue up **2.0%** to **EUR 3.0bn** but a lower earnings base, as industrial action in Finland led to the cancellation of a large number of flights in the early and late parts of the year.

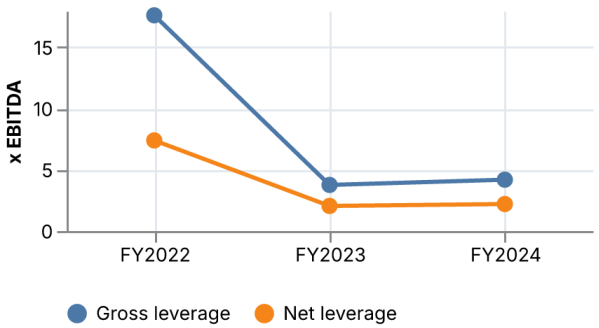

The EBITDA margin narrowed by **3.4 points** to **14.6%**, and net leverage rose by **0.16x** to **2.21x**.

The point to watch is leverage against the network peers: net leverage of **2.21x** is above the peer median of **1.88x** and the weakest of the group (**3rd of 3**).
